

B-2 Spirit Stealth Bomber

On November 22, 1988, the first B-2 Spirit Stealth Bomber made its debut when it was rolled out of its hangar in Palmdale, California. Its first flight was on July 17, 1989. The B-2 Spirit represents a major milestone in the U.S. bomber modernization program. The B-2 Spirit is difficult to detect by radar giving it the unique ability to penetrate an enemy's most sophisticated defenses. The B-2 has a crew of two, the pilot in the left seat and the mission commander in the right.
